Welcome from John Glenn

Today's space program is marked by a spirit of cooperation among the world's foremost scientific minds. We are constructing an International Space Station with our partner nations and building diplomatic bridges we never thought possible. We are truly entering a new world in the new century.

To meet the challenges, we need great minds and vivid imaginations. We need scientists and astronauts to make the journeys into space. We need writers and historians to tell the tale, and poets and dreamers to give us the inspiration for the trip. We need engineers to apply our new knowledge, to help us turn scientific data into everyday, life-enriching technology. The more we learn in space, the more we benefit from its exploration. Our journeys into space have already helped us live better lives on Earth.

Where are our explorers?

I can tell you that right now, the first man or woman to set foot on Mars is sitting in a classroom somewhere. And when I see the faces of SPACE CAMP trainees, I see the future of American space exploration.

SPACE CAMP takes a unique, fun and hands-on approach to learning outside the classroom. Participants leave with a greater appreciation of their lessons. The future needs people who are bright, passionate and innovative and I see all these things when I visit SPACE CAMP. I believe SPACE CAMP offers a glimpse into what our future will be like—and it is bright indeed.

John Herschel Glenn, Jr.

space camp®

5-Day Program

Tuition \$699 Alabama & Florida

Tuition \$799 California

Alabama
California & Florida

Ages 9*-11
Ages 9*-12

*Nine-year-olds must be currently attending or have completed 4th grade.

**OPEN
YEAR-
ROUND!**

BASIC TRAINING: During your five-day stay, you'll learn about the mental, emotional and physical demands astronauts must face. But at SPACE CAMP®, you don't just hear about what an astronaut does, you'll do what an astronaut does! You'll get strapped into the 5 Degrees of Freedom simulator to train for an extravehicular activity (a space walk to most people). Experience what it takes to move around on the moon in the 1/6th Gravity Trainer. Try your hand at controlling the Manned Maneuvering Unit (MMU)...the backpack that allows astronauts to work untethered from the shuttle. Spin like crazy in the Multi-Axis Trainer to feel what it's like to tumble in a spacecraft.

A TASTE OF SPACE:

Training like an astronaut means you sleep and eat like one, too. You'll bunk in the Space Habitat and you'll sample freeze-dried space food. You'll build and launch your own rocket, and you'll also see how hard it is to do even the simplest things in a space suit.

THE MISSION:

All this has to lead somewhere and for you it's an intense, realistic simulated mission in the Shuttle simulator and Mission Control. Put your training to

the ultimate test. But what will you be — Commander, Mission Specialist, Payload Specialist, Pilot or Mission Controller? The countdown begins. Feeling a bit nervous? You and your team will work together from liftoff to landing to meet the goals of your mission. It's a pretty cool way to spend five days!

REGISTER TODAY ON-LINE @
spacecamp.com

or call 1-800-63 SPACE

space camp®

Attend **SPACE CAMP** at one of three great locations:

HUNTSVILLE, ALABAMA

You'll stay at the U.S. Space & Rocket Center, the world's largest space museum and the official visitor center for NASA's Marshall Space Flight Center. You'll see the first rocket to put an American

into space, along with the massive Saturn V, the rocket that took Americans to the moon. Take a Mars Mission and see movies in our giant-screen IMAX® Spacedome Theater. And you'll get to feel four G's of liftoff force and the sensation of weightlessness on the **SPACE SHOT™** simulator.*

**New!
Hands-on
Science
Activities**

*Space Shot operates year-round weather permitting.

MOUNTAIN VIEW, CALIFORNIA

Explore the future of the space program at SPACE CAMP California, located at the NASA-Ames Research Center in the heart of the world's leading high technology region. Take a V.I.P. tour of Lockheed Martin Missiles & Space Systems to see the development of the International Space Station and learn about Venture Star, America's next-generation space transport vehicle. Complete the challenge of designing and building your own

space station on the interactive computer lab. Explore the three-story San Jose Tech Museum where science and technology from the Silicon Valley are showcased, and see the latest IMAX® space film. Spin out of control on the Multi-Axis Trainer patterned after one used by actual Mercury astronauts. Experience the simulated effect of weightlessness while suspended on the "Zero-G" Wall, where you and your teammates will be challenged with building techniques used by the astronauts. All your training will be put to the test when you fly your missions in two full-scale Space Shuttle orbiter cockpits!

TITUSVILLE, FLORIDA

You'll visit NASA's Kennedy Space Center and see firsthand the Apollo Saturn Center, Launch

Complex 39 and the International Space Station Complex. See the latest IMAX® space film — astronauts say it's the next best thing to actually being in space! Back at the training center, hang suspended on the "Zero-G" Wall where you and your teammates practice building techniques used by the Space Shuttle astronauts. You'll also learn the secrets of the universe at Florida's largest planetarium. And who knows...you may even see a real Shuttle launch!

NOTE: A minimum height of four feet is required for the simulators used in the program curriculum. Maximum weight for simulators is 260 lbs. Closed-toe shoes must be worn on all simulators.

REGISTER TODAY ON-LINE @ spacecamp.com

space academy®

5-Day Program Tuition \$799

Alabama Only

Ages 12-14

Get ready to have a blast! If you're interested in astronaut training and simulated space travel, then SPACE ACADEMY® is perfect for you.

The emphasis in SPACE ACADEMY is on Shuttle crew activities, mission control and Space Station simulators. Join your teammates on two missions where you and your crew will conduct experiments inside Spacelab and/or the Space Station, as well as critical operations outside the orbiter's crew cabin. It's as close to the real thing as you're going to get.

SPACE TRAINING:

If you want to be an astronaut, then you'll have to think like one. You'll be

briefed on everything from the Shuttle propulsion system to space suits, and you'll learn crucial things about life support systems.

You will also become familiar with the Space Shuttle cockpit simulator and the full-size Spacelab. Then, it's off to microgravity training, combining the use of our lake or pool with the 1/6th Gravity Trainer. In other words, you will live, breathe and even dream space travel via your training.

SPACE SHUTTLE MISSION:

Take your position as a Mission or Payload Specialist, Mission Control expert, or Shuttle Commander/Pilot. Your team is counting on you. Will you perform the tasks necessary to ensure a successful mission? Are you up to the challenge? Feel your adrenaline level soar as the mission control team announces your countdown. 5...4...3...2...1... We have liftoff! Remember, it takes teamwork to overcome any problems that may arise. Communication is the key. Once your first suc-

cessful mission is complete, you'll begin preparing for the next challenge by exchanging assignments for a second mission. Learn all about NASA's plans for the future and the International Space Station. You'll conduct experiments and learn how to adapt to the rigors of space.

G FORCES AND

WEIGHTLESSNESS: It's one thing to imagine what it must be like to be in a microgravity environment, but it's another to actually experience it. That's what we have planned for you, though, at SPACE ACADEMY. We use SPACE SHOT™, a 180-foot simulator that lets you feel the force of four G's as you lift off the launch pad; then feel two to three seconds of actual weightlessness as you experience the sensation of microgravity.*

*Space Shot operates year-round weather permitting.

advanced space academy®

5-Day Program
Tuition \$899

Alabama Only

Ages 15-18

SERIOUS SPACE, SERIOUS FUN!

If you're thinking about a high-tech career, you'll love ADVANCED SPACE ACADEMY. In this five-day program, you'll get hands-on training, as well as learn about the mental, emotional and physical demands astronauts must face. ADVANCED SPACE ACADEMY offers you the opportunity to focus on your field of interest:

Pilot, Mission Specialist or

Payload Specialist. When registering, you will need to specify your area of interest from the following:

PILOT (PLT):

Interested in a Pilot/Commander role? The PLT offers two track-specific labs:

- Space Piloting and Guidance
- Navigation and Control (GNC)

You will rotate through three mission positions: in the orbiter (Commander or Pilot), Mission Control (Flight Director or Capcom) and Space Station (Flight Operator).

MISSION SPECIALIST (MS):

Do you see yourself in an engineering & EVA (space walk) role? The MS

track offers two track-specific labs:

- Payload Operations
- Engineering Problems

You will rotate through three mission positions in the orbiter (Mission Specialist-EVA), Mission Control (EVA or Propulsion Officer) and Space Station (Station Officer).

PAYLOAD SPECIALIST (PS):

Maybe a scientific role on the Space Shuttle sounds interesting. The PS track provides two track specific labs:

- Space Exploration
- Space Medicine

You will rotate through three

mission positions in the orbiter: (Payload Specialist), Mission Control (Spacehab PI or Space Station PI) and the Space Station (Station Commander or Officer).

MISSIONS

ADVANCED SPACE ACADEMY offers the most in-depth training you can experience, including SCUBA training for all tracks. **IMPORTANT:** Certain medical conditions may prohibit trainee from diving! NEW THIS YEAR — exciting non-SCUBA track! You'll quickly learn the importance of teamwork as you embark on your missions. You'll work together on three one-hour training missions, rotating roles in the orbiter, Space Station and mission control. Decision-making skills are put to the test as you prepare for your extended

duration mission. This six-hour mission will be one of the highlights of your week. But your total immer-

sion into the space program doesn't end here. You'll definitely put your computer and engineering skills to the test as you and your team design and test a VR (virtual reality) Mars rover. To prepare for the future, you need to develop your leadership abilities, which is

why ADVANCED SPACE ACADEMY offers leadership training to help prepare you for your challenging shuttle missions. As part of this training, you'll visit our special, top-secret "Area 51."

Of course, ADVANCED SPACE ACADEMY is more than problem solving, high-tech tours and leadership training. You'll also have fun experiencing four G's of liftoff force and actual weightlessness on our SPACE SHOT™ simulator.* In addition, you'll get a realistic feel for living and working in space by watching IMAX® movies like "Destiny In Space" in our Spacedome Theater.

*Space Shot operates year-round weather permitting.

Spacelab

parent/child SPACE CAMP®

Weekend Program Tuition \$658/pair

Alabama, California & Florida

PAIRS ONLY: 1 Adult/1 Child age 7-11*

Minimum 2nd grade reading level recommended.

WHAT IS PARENT/CHILD?

A program designed to give each of you an overview of space exploration while experiencing very real space simulations. Parent/Child SPACE CAMP is a weekend for just the two of you, providing an opportunity for you and your child to become partners in learning.

5...4...3...2...1 and liftoff! Watch the rocket that you and your child built together soar. Share the pride that your child will feel while maneuvering the orbiter through space. What better way to build a lasting relationship than through Parent/Child SPACE CAMP?

TAKE A WALK ON THE

MOON: It's just one of the simulations you and your child will experience at Parent/Child SPACE CAMP.

The 1/6th Gravity Trainer simulates a walk on the moon's surface. And experience firsthand the Manned Maneuvering

Unit (MMU), similar to those used by Shuttle astronauts to maneuver in space. There's also the 5 Degrees of Freedom Trainer that simulates movements in microgravity.

MISSIONS: No astronaut training would be complete without a mission in space. Work side-by-side as you and your youngster do everything together. Maybe she'll be the Com-

mander while you're the Pilot. Or perhaps he'll be the Flight Director while you're in charge of communications. Self-confidence grows by the

hour as you work together to accomplish your goals. Our missions are as close to the real thing as we can make them and yet are appropriate for ages 7-11.

MORE FUN AND LEARNING:

Our PARENT/CHILD program is a weekend of non-stop activities. Together, you will explore the history, present, and future of space flight. You'll also build rockets together and then watch them launch. Experience the sensations of real Shuttle launches from giant-screen IMAX® movies, showing Shuttle astronauts performing important missions in space.

Participants will also receive a take-home packet of exciting activities to explore scientific concepts at home.

Tuition includes meals, educational programs and materials, accommodations and T-shirts for both of you. Parents and children of different sexes will be housed together in Alabama and housed according to gender in Florida and California.

NOTE: A minimum height of four feet is required for the simulators used in the program curriculum.

Maximum weight for simulators is 260 lbs.

Closed-toe shoes must be worn on all simulators.

*Program designed for one adult/one child pairs. Participating adult must be at least 19 years old and may be a family member or friend.

Brightest Stars

SPACE CAMP®
5-Day Program Tuition \$799

Alabama Only

Ages 9*-11

*Nine-year-olds must currently be attending or have completed 4th grade.

A SPACE CAMP PROGRAM FOR GIFTED STUDENTS

Gifted students need intellectual challenges that go far beyond the traditional educational setting. Recognizing this need, SPACE CAMP has created a special program just for them — Brightest Stars.

This program is correlated to selected math and science standards for gifted students.

REACH FOR THE STARS:

Lift off for the experience of a lifetime! Train like an astronaut on simulators patterned after those actually used by NASA.

Take your place on the crew of two two-hour simulated Shuttle missions. And perform some really cool experiments on the Space Station, like polymer studies, discovering how

space travel affects human physiology and actually experiencing disorientation to see how it affects reaction time. Then you'll build an advanced multi-stage rocket and put your engineering skills to the test when you launch it.

Think you've got what it takes? Check it out!

Enrollment in Brightest Stars is limited. Registrations will be accepted by fax or mail only. All application forms must be accompanied by a letter of recommendation from the gifted child's teacher.

SPACE CAMP® & AVIATION CHALLENGE®
for the blind and visually impaired & deaf and hard of hearing

Alabama Only

Grades 6-12

Group rates apply

These programs have attracted students from across the United States and around the world.

Over the years, we have worked closely with several organizations, including the Alabama Institute for the Deaf and Blind, the West Virginia Schools for the Deaf and the Blind, and most recently, the Western Pennsylvania School for the Deaf, to develop a meaningful, inspirational experience for these students.

Program highlights include a presentation by blind and deaf NASA professionals on career choices and working in the space industry. Enlarged print, sign language interpreters, attention to mobility hazards and other special considerations are extended to put trainees at ease. Blind students also benefit from the latest technology in the field — tactile Braille displays and synthetic speech for the computers.

For more information about the Deaf & Hard of Hearing Program, contact Amy Newland at (412) 371-7000, or visit the website at: www.userc.com/wpsd/

2001 Deaf & Hard of Hearing session date: April 22-27

For details about SPACE CAMP for Interested Visually Impaired Students (SCI-VIS) contact Dan Oates at (304)822-4883 or E-mail: scivis@raven-villages.net

Visit SCI-VIS website at the Texas School for the Blind & Visually Impaired at: www.tsbvi.edu/spacehome.htm

Call 1-800-63 SPACE or visit www.spacecamp.com for program dates.

space academy[®]

For Adults

SPACE ACADEMY for Adults

Alabama Only \$399*
Weekend Program

*Effective Jan. 1, 2001

Admit it. You've always wondered how it would feel to train like an astronaut.

Adult SPACE ACADEMY is as close as you'll get. Put your skills, abilities and talents to the test in training simulators and simulated

missions. Experience four G's of force when you blast off 150 feet on SPACE SHOT[™]. Feel what it's like to walk on the moon in the 1/6th Gravity Trainer, then experience a simulated tumble in space in the Multi-Axis Trainer.

You'll also alternate roles in mission control and shuttle crew during two different Space Shuttle missions.

Witness space exploration almost firsthand in a giant-screen IMAX[®] Spacedome theater presentation. Tours of NASA's Marshall Space Flight Center and the U.S. Space & Rocket Center round out your weekend.

Adults are housed in the Habitat in groups of four.

spacecamp.com

ADVANCED SPACE ACADEMY for Adults

Alabama Only \$899
5-Day Program

You'll perform all the activities from the weekend program, plus much more. Your week-long astronaut adventure also includes SCUBA diving in our on-site Underwater Astronaut Trainer.

IMPORTANT: Certain medical conditions may prohibit trainee from diving! Then design a Mars Rover on computer and test its performance.

For your Shuttle missions, choose your field of interest and pursue it in one of three tracks: Pilot/Commander, Mission Specialist or Payload Specialist. You will rotate through the orbiter, space station and mission control on three training missions. Your week-long adventure culminates in an exciting six-hour Shuttle mission, complete with the traditional NASA steak and egg breakfast prior to launch.

Educational programs designed by educators for educators

SPACE CAMP 1-Day Program \$55

Alabama Only

Includes program materials, lunch and IMAX® movie.

Looking for something exciting and meaningful for your school and/or class for Aerospace Week? Check out our one-day SPACE CAMP workshops offering exciting and relevant cross-curriculum ideas along with implementation plans for class and school-wide projects.

Session dates:

Sept 23, 2000 March 3, 2001
Feb 17, 2001

SPACE CAMP 3-Day Program \$350

Alabama Only

Includes meals, program materials, two IMAX® movies and Marshall tour. Lodging NOT included.

Immerse yourself in space science and exploration in this three-day/two-night camp adventure. You'll delve into the history of space travel and discover what lies ahead in the future of space exploration. Take your place on the team for a simulated Shuttle mission, then take home ideas and activities for the classroom from our space science and exploration workshops. You'll also hear from scientists at NASA's Marshall Space Flight Center and visit the NASA Educator Resource Center on-site at the U.S. Space & Rocket Center.

Session dates:

Jan 19-21, 2001
March 16-18
April 20-22

SPACE ACADEMY 6-Day Summer Program \$799

Alabama & Florida

Includes lodging, meals, flight suit and program materials.

This program provides approximately 40 hours of intensive classroom, laboratory and training time focusing on space science and space exploration. You'll participate in astronaut-style training and simulations, along with exciting activities we've developed to promote life-long learning in a classroom setting. Take part in workshops designed to bring the excitement and wonder of space exploration into the classroom.

Upon completion of the course:

Alabama attendees receive three semester hours of graduate credit with a letter grade.

Florida attendees receive Continuing Education Units

Session dates:

June 12-17, 2001
June 19-24
June 26-July 1 (Alabama only)
July 10-15
July 17-22

SPACE ACADEMY 6-Day Fall/Winter/ Spring Program \$650

Alabama Only

Includes meals and program materials. Lodging NOT included.

Three semester hours of graduate credit with a letter grade or Continuing Education Units can be earned upon completion of the course. This program provides approximately 40 hours of classroom, laboratory and training time, while focusing on space science and space

exploration. Whether you are attending with a group of students, or merely looking for an opportunity to grow both personally and professionally, this program is for you! You'll participate in exciting astronaut-style training and simulations, along with exciting activities and projects developed to promote life-long learning in a classroom setting. This program will ONLY be offered the following dates, so make your plans early.

Session dates:

Feb 11-16, 2001 April 8-13
March 4-9 April 22-27
March 18-23 May 6-11

AVIATION CHALLENGE 3-Day Program \$350

Alabama Only

Includes meals, program materials, two IMAX® movies and a NASA tour. Lodging NOT included.

This three-day/two night program is non-stop fun as you explore the history and future of aviation, practice land and water survival techniques, and participate in high-performance aircraft simulations. The curriculum includes workshops offering aerodynamics and aviation ideas and activities for the classroom.

Session dates:

Sept 29-Oct 1, 2000 Aug 10-12
May 18-20, 2001 Sept 14-16
July 6-8

group programs

THE ULTIMATE CLASSROOM

Group leaders agree that a week spent at one of these programs has more educational impact on their students than a week in the traditional classroom setting. SPACE CAMP participants are immersed in the exciting world of space science, and AVIATION CHALLENGE participants explore the dynamics of aviation. The knowledge and confidence students gain during their week of camp remain with them when they return to the classroom.

Pre/post curriculum and evaluation tools based on national math, science and technology standards are available upon request.

WHAT MAKES UP A GROUP?

In order to be booked as a group, 12 or more students must register together for a five-day program only. Eleven students or less wishing to attend a program together are not eligible for group rates. Please see sections 2 & 3 in the Parent Information Section for registration and payment information.

Group reservations subject to availability.

GROUP PAYMENT POLICY

IMPORTANT: We cannot accept individual payments for group bookings. Deposit and final balance fees are each payable (by one check) for the amount due to: U.S. Space & Rocket Center. Individual payments received for group bookings will be returned to the group leader.

Any reservation made within four months of session date requires full payment no later than 30 days after the reservation is made.

- Only one chaperone attends free for every 12 paid students.

Return all forms & payment to:
Group Reservations
U.S. Space & Rocket Center
P.O. Box 070015
Huntsville, AL 35807-7015

CHAPERONE ACTIVITIES:

Upon arrival, the group leader ensures that all students are registered and settled in. Then our program staff takes responsibility. We do ask that chaperones assume the role of emergency contact while the children are in the program.

Chaperones follow a flexible schedule which allows them frequent opportunities to check on their group. Chaperones receive an introductory tour of the facility, a personalized name badge allowing access to the facility, all meals and a list of suggested activities that they can participate in during the week.

Educators interested in earning graduate credit or Continuing Education Units, refer to page 12-SPACE ACADEMY Fall/Winter/Spring Program.

CHAPERONES: Please note that you do not stay in the Habitat and you are responsible for making your own lodging* and transportation arrangements.

*Lodging available at AVIATION CHALLENGE California

GROUP AWARDS PROGRAM:

SPACE CAMP and AVIATION CHALLENGE will donate one free tuition to any group with 24 paid tuitions. **You must have 24 paid student tuitions to receive one free.** Tuition must be used at the time your group attends.

NON-ENGLISH-SPEAKING GROUPS:

Every year, groups from around the world enroll in SPACE CAMP and AVIATION CHALLENGE. We have established the following guidelines so that non-English-speaking participants may enjoy the best possible camp experience:

- Non-English-speaking groups are booked in the off-season ONLY (September -May).
- Translation fees apply and will be quoted.
- Every 12 individuals must be accompanied by an English-speaking interpreter.

Group Rates

Any group with 12 or more participants is eligible for group discounts.

5-Day Program
Tuition \$699

Alabama & California **Ages 9*-11**

*Nine year olds must be currently attending or have completed the 4th grade

MACH I

Solo in your jet simulator. Learn the basics of flight, wilderness survival and teamwork. Just like it's done every day at fighter squadrons across the United States. It's five days of nonstop excitement in our MACH I program.

ings, you and your teammates will learn what it takes to put an aircraft through all the maneuvers – airfield operations and air combat maneuvering. You will spend seven hours in the cockpit as a flight crew member, mastering the techniques of high performance flight. You will also experience the excitement of simulated air-to-air engagements against other teams. The ultimate test comes during your final air-to-air competitions to determine who wins the coveted "Top Gun" award.

BRIEFING:

Learn what makes an airplane fly. You'll get hands-on training in aerodynamics, propulsion, aeronautics, and more. You will also experience the thrill of seeing real jet fighters and learning about their combat history. And you'll find out what flying does to the human body and why fighter pilots must be in top physical condition.

FLIGHT TRAINING:

Experience the excitement of learning to fly a high-performance jet simulator. In pre-mission brief-

LAND AND

WATER SURVIVAL:

When the time comes to "bail out," you'll be ready. At AVIATION CHALLENGE, you will learn what it takes for real pilots to survive on both land and water. From safe and controlled exercises, you'll learn the basics of navigation, escape and evasion, signaling, firecraft, shelter building, life raft procedures, aircraft evacuation and more.

BOY SCOUTS:

You will complete all requirements for the Aviation merit badge while at AVIATION CHALLENGE. In addition, you will partially complete requirements for the Fire Safety, First Aid and Wilderness Survival merit badges. See page 31 for more details.

Outdoor activities conducted as temperature and weather permit.

5-DAY PROGRAM
Tuition \$799

Alabama & California Ages 12-14

New for 2001
Alabama only:
Navy SEAL Team
Search & Rescue
Mission

MACH II

It takes a special person to fly jets. If you're cool under pressure, extremely focused, intelligent and confident about your abilities to get the job done, then we've got the program for you – MACH II. Don't just dream about being a fighter pilot, learn how to become one at AVIATION CHALLENGE. MACH II is designed to let you take that first step towards your goal of becoming an Air Force, Army, Navy or Marine pilot. Or maybe you just like the thought of learning the principles of flight and want to get a taste of the real thing. Whatever your interest level, we guarantee you'll be immersed in aviation and aeronautics for five full days.

FLIGHT TRAINING: You'll learn what teamwork is all about as you engage in 7 hours of jet training simulation. You'll begin with a thorough mission pre-brief – then it's time for flight in our new state-of-the-art simulators. Experience basic flight instruction, including

takeoffs and landings, and navigation in our simulator training program. Then move to the F-18 Hornet simulator for air combat training and missions against air and ground targets. Compete

against other trainees for the coveted "Top Gun" award! In addition you will learn the basics of aerodynamics, aeronautics, and propulsion as you check out our on-site aircraft. Ever

see a high-performance combat jet up close? You will at AVIATION CHALLENGE. What a great way to spend five days!

LAND AND WATER SURVIVAL:

Every skilled pilot has to be prepared for just about any emergency. At AVIATION CHALLENGE, you'll learn the basics of water and land survival. Learn how to keep your cool while stranded at sea or lost in the woods. Find out where

you are by using a compass and the Global Positioning System (GPS). Once that's accomplished, it's time to build a good fire. Depending on your situation, you may need to use it as a source of heat or a signal for rescue during escape and evasion. Build your self-confidence. Learn what it takes to be a real fighter pilot. Our MACH II program is just waiting for you to take off and soar!

BOY SCOUTS:

You will complete all requirements for the Aviation and Wilderness Survival merit badges while at AVIATION CHALLENGE. In addition, you will partially complete requirements for the Fire Safety and First Aid merit badges. See page 31 for more details.

Outdoor water activities are not offered during October-May.

5-Day Program
Tuition \$899

Alabama & California Ages 15-18

New for 2001
in Alabama:
Navy SEAL Team
Bridge
Demolition

MACH III

It's five days of the ultimate rush! Are you up to the challenge? You'll be better prepared after seven hours aboard a supersonic jet fighter simulator.

MACH III is a program designed for people who want to take their interest in jet fighters to (literally) a higher level. In addition to learning the fundamentals of flying, you'll progress through increasingly sophisticated simulator missions which will put your skills to the ultimate test. But MACH III is more than just simulator training. It's also about teamwork when you and your squadron work together to be top aviators. AVIATION CHALLENGE puts you one step closer to your dream of flying.

ment techniques. You'll also test out the Helo Dunker and Helo Hoist activities while you're at the AVIATION CHALLENGE water survival area. Life raft training in both single and multiple-person rafts will round out your water training. Then you'll spend time in the woods learning wilderness survival just like real fighter pilots.

FLIGHT SIMULATORS AND COMPETITION: Practice basic flight maneuvers and then progress

to advanced combat missions in our F-15 Eagle simulators. The realism of our state-of-the-art graphics and large screen projection will take your breath away! "Tally Ho" and fight's on. See how many air-to-air victories you can score over your opponents. Then prepare for the ultimate competition, the Red Flag competition. This event combines flight, land and water activities and escape and evasion (E&E) tactics. Your individual abilities, as well as those of your teammates, are reflected in this realistic exercise.

LAND AND WATER SURVIVAL: Take a deep breath. You're about to slide 100 feet down a guide wire in a simulated parachute splashdown. Once down, you'll have the chance to practice parachute disentangle-

PRINCIPLES OF FLIGHT:

Mission planning and execution are not complete without understanding the principles of flight, including aeronautics, aerodynamics, propulsion, flight physiology, aviation history and more. You won't learn these principles with your nose buried in a book. At MACH III, we demonstrate these principles by surrounding you with actual jet planes, such as the F-14 Tomcat, F-4 Phantom, AV-8 Harrier, F-16 Falcon and SR-71 Blackbird. See the power and beauty of these machines up close and listen carefully as your camp instructor provides you with intricate details about the engineering concept of each aircraft.

WEEKEND PROGRAMS

PILOT/COPILOT*
Parent/Child Program
Tuition: \$658/pair

Alabama & California

*Child must be 7-11 years old.

At AVIATION CHALLENGE, we don't just talk about "quality time," we practice it!

Our PILOT/COPILOT program is the perfect setting for you and your child to get away and do something really special together.

Maybe you've been on the road a lot and are looking for a good way to reconnect with your son or

daughter. Or maybe you want to share your love of aviation with him or her and just have a great time. Whatever the reason, PILOT/COPILOT will bring you together in ways you haven't yet discovered.

This weekend program combines the fun of simulated jet fighter pilot

training with guided tours of some of the finest flying machines ever built. But there's more. You'll also do missions together, side by side, as teammates. You'll build and fly your own balsa airplane. And you'll practice land and water survival techniques. Get that fire started. Where's the escape route from the

Helo Dunker? PILOT/COPILOT builds confidence in youngsters by encouraging them to try new things, meet new people and overcome challenges in a safe and positive environment. It also gives you the opportunity to be with your child – sharing, exploring and working together. Quality time doesn't have to be a concept. It's real in our PILOT/COPILOT program.

Parent/child pairs are housed together in the same facility at both locations.

**AVIATION
CHALLENGE®**
for Adults*
Tuition: \$399

Alabama & California

Admit it. You've always wondered what it would be like to be a jet fighter pilot. Here's your chance.

AVIATION CHALLENGE for Adults is the next best thing to real flying. We put you through the paces with pre-briefings

that bring you up to speed on the basics of aeronautics and aviation, followed by training in our realistic jet fighter simulators. Learn basic maneuvers of aerial engagement.

AVIATION CHALLENGE for Adults also teaches you land and water survival techniques, plus surrounds you with authentic military aircraft.

We're talking some serious fun here. Of course, no training would be complete without G-force training. Try our two-person centrifuge that makes your arms and legs feel like lead as it spins you around with three G's of force.

*Also available as a corporate development or incentive program. Call 1-800-894-2773 for details and pricing.

FLIGHT SUIT \$75.00

Order the official flight suit for your SPACE CAMP®, SPACE ACADEMY® or AVIATION CHALLENGE® adventure! These authentic-looking flight suits are representative of what real astronauts and jet fighter pilots wear. The light blue camp suit comes with official SPACE CAMP and NASA patches. The olive drab AVIATION CHALLENGE suit (*not available in Florida*) also has official patches. All suits come with a customized leather name tag.

FLIGHT SUIT Youth sizes 10-20 Adult sizes S-XXL

**Merchandise shown features the Alabama camp logos. In the event a style shown is not available, a comparable item will be substituted.*

SPACE CAMP Florida Video \$30

Order a 30-minute video of your Florida five-day SPACE CAMP experience! (Not available for Parent/Child or Educator SPACE CAMP.)

Your video features camper's team participation during the Space Station presentation and training on the Multi-Axis simulator. The video also includes the graduation ceremony, an interview with the camper and a general overview of the entire Space Camp experience.

To place your order, complete the SPACE CAMP video line on the order form portion of the application or indicate you'd like a video when registering by phone. Please allow 8-10 weeks* for delivery after your camp session. **May take longer during summer months.*

All clothing ordered for camp will be distributed at camp unless otherwise specified. When placing your order, be prepared to provide a size. Upon distribution, all campers are sized to ensure proper fit. If you'd like to receive your clothing prior to camp, please call the number listed below for the camp you are attending.

About the Programs

AGE/GRADE APPROPRIATENESS

Since we opened our first camp in 1982, we have gathered a wealth of experience developing and providing curriculum that is age and grade specific.

Reading levels, cognitive learning skills, and emotional maturity are just a few of the factors we have used over the years to develop programs that will not only be fun, but "comfortable" for

young people of all backgrounds. For example, we make every effort to arrange teams so that each child has an age or grade in common.

We know from experience that a child is not going to enjoy our camp if he or she is intimidated by older students or can't keep up with the intellectual or physical demands of a level higher than what we have designed for them.

Please help us achieve the very best experience possible for your child by enrolling him in the camp that corresponds with his age.

To meet the needs of gifted students, we have created a special program in Alabama – BRIGHTEST STARS (see pg. 10). If your child is gifted, we encourage you to apply. These sessions fill quickly and space is limited, so register early.

Registrations are accepted by fax or mail only and must be accompanied by a letter of recommendation from the gifted child's teacher.

We reserve the right to request proof of age and/or grade.

ACCREDITATION

Alabama and Florida facilities are accredited by the American Camping Association, following its strict guidelines for operation.

LOCATIONS

SPACE CAMP Huntsville, Alabama

U.S. SPACE CAMP opened its first facility in Huntsville, Ala., in 1982.

The Huntsville facility is an entity of the U.S. Space & Rocket Center® (USSRC), which was established by the State of Alabama. The USSRC and U.S. SPACE CAMP are primarily self sufficient with added support from corporate partners.

The USSRC is the official NASA Visitor Center for the Marshall Space Flight Center (MSFC) and receives no direct federal funding for operational support. NASA/MSFC does, however, supply technical assistance and expertise and is a contributor to programs for educators.

AVIATION CHALLENGE Huntsville, Alabama

The AVIATION CHALLENGE program began operation in June 1990.

The Huntsville facility is an entity of the U.S. Space & Rocket Center (USSRC), which was established by the State of Alabama. The USSRC and AVIATION CHALLENGE do not receive federal or military funding for operational support.

AVIATION CHALLENGE does receive in-kind technical support from the Armed Services.

SPACE CAMP Moffett Field in Silicon Valley, Mountain View, California

U.S. SPACE CAMP California began operation in July 1996 at NASA's Ames Research Center — heart of development and planning for future U.S. space exploration projects.

The California facility is centrally located in the world famous Silicon Valley, near the international airport in San Jose.

SPACE CAMP California is funded by the U.S. SPACE CAMP Foundation — a private, non-profit, tax-exempt organization — and receives no direct federal funding for operational support. The camp does receive technical assistance and expertise from NASA-Ames as a contributor to on-site educational programs.

AVIATION CHALLENGE Atwater, California

AVIATION CHALLENGE California began operation in June 1997 at the former Castle Air Force Base.

The California facility is funded by the U.S. SPACE CAMP Foundation, a private, non-profit, tax-exempt organization.

SPACE CAMP Titusville, Florida

U.S. SPACE CAMP Florida opened in April 1988 and is operated jointly by the U.S. Space Camp Foundation — a private, non-profit, tax-exempt organization — and the Astronaut Scholarship Foundation.

The SPACE CAMP Florida Training Center is located near NASA's Kennedy Space Center and shares a complex with the U.S. Astronaut Hall of Fame®.

SPACE CAMP Florida is funded by the U.S. SPACE CAMP Foundation and receives no direct federal funding for operational support.

COUNSELOR QUALIFICATIONS & TRAINING

You are entrusting us with the security and well-being of your child. Our rigid standards for hiring qualified counselors, as well as training them, have been established to ensure that your child enjoys a safe, fun and educational experience while attending our programs.

A minimum of two years of college or equivalent experience is mandatory for all counselors. While a significant percentage of our staff are education majors, others are pursuing degrees in business, science, math or the liberal arts. The common thread they all share is that they want to work with children. Many staff members have actually gone through the camp programs as trainees.

Every potential counselor must pass a comprehensive background check, pre-employment attitude test and drug screening prior to employment. Once employed, and before they ever meet a trainee, all program staff members receive training in the following areas: program facts and history; simulator safety and operation; proper discipline techniques as outlined by the American Camping Association; and age-specific behavioral characteristics.

All counselors are closely supervised and are evaluated weekly at the end of each camp session by their team members. We encourage parents to meet program staff members at registration and graduation.

SAFETY & MEDICAL

Security

Camp supervisory staff and a separate security staff are on site or on call 24 hours a day, seven days a week when camp is in session to ensure the safety of your child. At no time are trainees allowed off-site individually or as a group without an accompanying adult. Off-site trips are limited to those included in the program curriculum.

Safety

The safety of all trainees is of utmost importance. Counselors are highly trained and certified in the proper use of all simulators so that trainees may have a safe, enjoyable experience.*

Each simulator is built to the highest standards and all equipment is safety checked and maintained by professional technicians. Each enclosed simulator is equipped with smoke detectors. It is mandatory that trainees wear safety helmets when using most of the astronaut training equipment.

A minimum height of four feet is required for the simulators used in the program curriculum. Maximum weight for astronaut training simulators is 260 pounds per person.

*Some of the space flight simulators may cause motion sickness.

Medical Staffing

Medical staff is on-site 24 hours daily in Alabama. Medical staff is on-site from 7 a.m. to 11 p.m. in California and Florida, and on-site or on-call the remaining eight hours while camp is in session.

All medications (prescription, over-the-counter, vitamins, herbal) are collected during registration and dispensed as directed by you or the prescribing physician.

They must be in their original

containers with labels and instructions in English. Trainees requiring injections must provide medications; syringes; and legible, signed instructions from your physician.

Any medically related questions may be directed to the nursing staff at the camp in which you are interested. Refer to camp phone listings on page 32.

Special Needs Accommodations

Every effort is made to accommodate individuals with special needs — including those who are hearing or visually impaired, those with special dietary requirements, or individuals in wheelchairs.

To learn more about our capabilities, please call the camp in which you are interested. Refer to phone listings on page 32.

We require advance notice on our health form if your child is a special needs attendee.

HOUSING

SPACE CAMP Alabama

Trainees are housed in the Space Habitat, a futuristic space station mock-up, in individual rooms of up to seven persons or bays of 20-40 beds. The Habitat complex accommodates 800 people at full capacity, so a certain amount of noise is to be expected.

- Bed sheets and blanket, pillow and pillowcase, towels and

washcloths are provided. Bring a beach towel for water activities. Each trainee will have an assigned locker. Please bring your own lock.

- Restrooms are located throughout the complex with access to sinks, private shower stalls and private toilets.

AVIATION CHALLENGE Alabama

The AVIATION CHALLENGE Hangar houses up to 30 trainees in military-style bays. Counselors are housed with trainees in each bay.

- Bed sheets and blanket, pillow and pillowcase, towels and washcloths are provided. Bring a beach towel for water activities. Each trainee will have an assigned locker. Please bring your own lock.

- Restrooms are located throughout the complex with access to sinks, private shower stalls and private toilets.

- Males and females are housed in separate bays.

SPACE CAMP California at Mountain View

The Habitat is located on site and comprised of modular units with bunk beds in an open-bay setting. Each sleep bay accommodates 38 trainees with a counselor's room located at one end of the sleep bay.

- Bed sheets and blanket, pillow and pillowcase, towels and washcloths are provided. Bring a beach towel for water activities.

Each trainee will have an assigned locker. Please bring your own lock.

- Restrooms are located in each Habitat with access to sinks, private shower stalls and private toilets.

- Males and females are housed in separate bays.

AVIATION CHALLENGE Atwater, California (at the former Castle Air Force Base)

When you train like a jet fighter, you might as well stay where the jet fighters stayed.

Trainees stay in refurbished BOQs (Bachelor Officer's Quarters). Similar to a hotel, each room's

entrance is off a main hallway. There are 24 counselor rooms, each housing two same gender counselors. Counselor rooms are located at the ends of each hallway.

- Bed sheets and blanket, pillow and pillowcase, towels and bar soap are provided. Bring a beach towel for water activities. Each trainee will have an assigned locker. Please bring your own lock.

- Each trainee suite shares a restroom with access to sinks, private shower stalls and private toilets.

- Males and females are housed in separate areas of the dorm.

SPACE CAMP Florida

Trainees stay in the Habitat, a four-story housing complex located next to the SPACE CAMP Training Center. Each sleep bay accommodates 24 trainees in bunk beds. A counselor's room is located at one end of the sleep bay.

- Bed sheets and blanket, pillow and pillowcase, towels and washcloths are provided. Bring a beach towel for water activities during June, July and August. Each trainee will have an assigned locker. Please bring your own lock.

- Each sleep bay has sinks, private shower stalls and private toilets.

- Campers are housed by gender in separate sleep bays.

MEALS

Breakfast, lunch and dinner are provided in a common dining area from the afternoon/evening of arrival up to graduation.

At each meal, we offer a variety of foods to appeal to different preferences. Snacks and soft drinks are also available at various sites within the facility at the trainee's expense.

We try to accommodate trainees with special dietary requirements. If the requirement exceeds our capabilities, trainees can bring their own food and/or pay the additional cost of meeting those needs.

Do not send food to camp with your child unless it is to accommodate special dietary needs.

We do require advance notice if your child will be bringing food for this reason – please call the camp you are attending (Refer to camp phone listings on page 32).

SAMPLE MENU

Breakfast

Cold cereal
Pancakes and waffles
Biscuit and sausage
Tater tots
Fruit
Milk and juice

Lunch

Meat entree
Vegetarian entree
Pizza
Selection of vegetables
Sandwiches
Salad bar
Homemade soup
Assorted cakes, pudding and gelatin
Choice of soda or milk

Dinner

Meat entree
Vegetarian entree
Selection of vegetables
Pizza
Sandwiches
Salad bar
Assorted ice cream
Choice of soda or milk

Reservations for all camp locations are made through our Reservations Center in Huntsville, Alabama.

We encourage you to register early for summer sessions.

To register, complete the attached application form and choose ONE of the following options:

IMPORTANT:

- Incomplete applications delay registration and may result in missing desired session date.

On Line:

For Credit Card Purchases Only.

Log on and click on the register on-line link:

SPACE CAMP: spacecamp.com

AVIATION CHALLENGE:

dogfite.com

Telephone:

For Credit Card Purchases Only.

To register for SPACE CAMP, call 1-800-63 SPACE.

To register for AVIATION CHALLENGE, call 1-888-DOGFITE (364-3483).

Have **completed** application form and credit card handy.

International calls: 1-256-721-7150

FAX:

For Credit Card Purchases Only.

Fax **completed** application form to 256-890-3369. Make sure credit card information is complete.

Mail:

If paying by credit card, check or money order, mail **completed** application form with payment, including choices of session dates, to:

U.S. SPACE CAMP Reservations
P.O. Box 070015
Huntsville, AL 35807-7015

Sibling Discount

When more than one child from the same family with the same address attends any five-day program during the same session week, one child will attend at full tuition, and each additional child will receive a 10% discount. Sibling discounts are not available for Parent/Child or Pilot/Copilot programs **and** cannot be used with any other discount or special offer.

Gift Certificates

You may purchase a gift certificate for any camp program. When making your reservation, be sure to inform the agent that you'd like us to issue a gift certificate. Gift certificates will be mailed within five business days.

Transfer Requests

All session transfer requests must be received no later than two weeks prior to scheduled session start date. You may request one session transfer at no charge.

Each additional transfer will cost \$25.

We reserve the right to cancel a session date if participation numbers are not adequate. You may select an alternative session date or you may request a full refund of tuition paid.

Waiting List

Summer and holiday sessions fill quickly. If your desired session date(s) is full at the time you register, you can be placed on our waiting list. **NOTE:** Wait list registration is available on our website or by calling our reservations staff. If a slot opens up, we will call you.

Scholarships

A limited number of full and partial-tuition scholarships for Spring and Fall sessions are available to students currently attending fourth through twelfth grades. To be considered for a scholarship, students must submit a scholarship

application form accompanied by a short essay on a topic designated by the scholarship office.

Scholarship applications are available from October 1 to May 1. To receive a scholarship application, call 1-800 63 SPACE. For more scholarship details write: Scholarship Office
U.S. SPACE CAMP
P.O. Box 070015
Huntsville, AL 35807-7015

Scholarship applications for all camp locations must be submitted to the Huntsville, AL address above. Deadlines for completed essays are December 1 and June 1. Winners will be notified 8-10 weeks after the deadline. Entries are not carried forward.

Because sessions fill quickly, you may wish to consider registering while pursuing a scholarship. Should you receive a scholarship, your tuition will be refunded.

You do not have to pre-register in order to apply for a scholarship.

3. Payment Options

A. Credit Card

- VISA • MasterCard • Discover
- American Express

You may pay by credit card when registering on line, by phone, fax or mail. Be sure you have completed all the credit card information on the application form.

B. Check or Money Order

If you are registering by mail and wish to pay by check or money order, please include the full amount payable to:
U.S. Space & Rocket Center.

Refund/Cancellation Policy

In the event you must cancel your reservation, you will receive a refund as defined below:

- **Cancellation notice must be submitted in writing.**
- Refund will be issued in the same manner payment was made.
- 90% of tuition paid will be refunded if written notice is received no later than four weeks prior to session start date.
- Cancellations received within four weeks of session start date forfeit full tuition.

Requests for cancellation due to illness or accident require a physician's written verification. Upon receipt of verification, we will issue a full refund. Trainees who leave during a session for other reasons (homesickness, etc.) will not receive a refund.

4. Countdown to Camp

Confirmation Package

After you have registered and received an account number, there are several forms that **MUST** be completed and returned prior to your arrival at camp. A description of each form is listed here. You have the option to receive these forms one of two ways:

E-mail If you provided an e-mail address, we will e-mail you within 24 hours of receipt of your reservation with instructions on how to access the required forms from our web site.

Mail: If you did not provide an e-mail address when you registered, we will mail you a confirmation package that will include the required forms.

- **Transportation Form** If someone other than parent is picking up

camper, please provide name where requested.

- **Health Form Requires** a physician or nurse practitioner signature AND parent signature.

- **SCUBA Medical Release/SCUBA Waiver & Release Agreement** Alabama ADVANCED ACADEMY only. A physician's signature is mandatory.

- **Photo/Video/Film Release Form**

Your reservation is not complete until we have received all of your completed forms.

IMPORTANT: Your child cannot begin the program without a completed health form on file.

TRAVEL INFORMATION

Transportation Form

Your Confirmation Package will include a transportation form which **must** be completed and returned as soon as possible **even if you are driving.** Prompt return of this form ensures that personnel are available to assist with arrival and airport transfers.

If we do not receive this form, we will assume you are arriving by car and do not require personnel to meet your plane or bus.

Transportation Fees

Refer to the Airline Travel section for important flight booking information.

If we are to pick up and/or return your child to the airport, we do require a transportation fee. This fee is the same whether you require roundtrip or one-way transportation. **ONLY AVIATION CHALLENGE California** offers a one-way rate.

Airport transportation is provided **EXCLUSIVELY** to and from the airports listed on page 30. We **DO NOT** pick up from any other airport.

Alabama

- SPACE CAMP or
 - AVIATION CHALLENGE
- Huntsville International Airport**
Transportation fee - \$15

California*

- SPACE CAMP
- San Jose International Airport**
Transportation fee - \$25
- AVIATION CHALLENGE
- Fresno Yosemite Int'l Airport**
(1-1/2 hours from Aviation Challenge)
Transportation fee - \$50 round-trip
Transportation fee - \$25 one-way

***We do not provide transportation between SPACE CAMP California and AVIATION CHALLENGE California.**

Florida

- SPACE CAMP
- Orlando International Airport**
Transportation fee - \$35

Transportation fees vary due to the distance between each camp location and its corresponding airport.

AIRLINE TRAVEL

Do not make your airline reservations until you have a confirmed session date.

ALABAMA

SPACE CAMP/SPACE ACADEMY/ AVIATION CHALLENGE: Book departing flight after 2 p.m. on Friday.

ADVANCED SPACE ACADEMY:

Book departing flight after 6 p.m. on Friday in June, July and August.

Book departing flight after 3 p.m. on Friday September through May.

CALIFORNIA

SPACE CAMP: Book arriving flight after noon on Sunday. Book departing flight after noon on Friday.

AVIATION CHALLENGE: Book departing flight after 2 p.m. on Friday.

FLORIDA

SPACE CAMP: Book departing flight after 2 p.m. on Friday.

Delta Air Lines

As the official airline of U.S. SPACE CAMP and AVIATION CHALLENGE, Delta Air Lines offers:

- 10% discount for tickets purchased 60 days in advance
- 5% discount for reservations made 30-59 days prior to travel
- Zone Fares with no Saturday night stay
- Waiver of the return unaccompanied minor fee for SPACE CAMP and AVIATION CHALLENGE attendees (fee applies one-way from originating city only)

To make your airline reservations directly through Delta call **1-800-241-4141** and be sure to reference file number 116886A to receive your discount.

STERLING TRAVEL
WorldTravel Partners Affiliate

If you need assistance with your travel arrangements, contact SPACE CAMP's travel agency, Sterling Travel, at 1-800-241-5106 between 8 a.m. and 5 p.m. Central Time Monday-Friday.

If you make your arrangements through Sterling Travel, they can take care of any itinerary changes or emergencies. Sterling cannot make changes to arrangements made by another agency or airline. Delta Air Lines discounts are also available through Sterling Travel.

We issue electronic tickets whenever possible — you will receive two copies of the itinerary/invoice along with the original passenger receipt.

We strongly recommend you confirm your airline reservations 7-14 days prior to your date of departure.

When making your reservation through Sterling Travel, please have the following information available:

- Program session dates
- Program attending (*SPACE CAMP, SPACE ACADEMY, etc.*)
- City you will be flying from
- City you will be flying in to (*Huntsville, Ala.; Orlando, Fla; San Jose, Calif.; Fresno, Calif.*)
- Credit card number and expiration date

IMPORTANT

All airlines require Unaccompanied Minor (UM) service for children under 14. Fees vary by airline and are subject to change without notice. Your travel agency cannot make a UM reservation for you; however, they can notify the airline that you will be requesting this service. **Round-trip UM fees are your responsibility and are payable to the airline at the ticket counter. SPACE CAMP and AVIATION CHALLENGE will not pay UM fees.** Some airlines also offer a complimentary meet and assist program for children over 14. Check with your airline.

ARRIVAL AT CAMP

Trainees arriving via air are greeted at the airport by uniformed camp personnel with photo identification and transported by bus or van to SPACE CAMP or AVIATION CHALLENGE. Staff members collect airline tickets and re-confirm return flights.

Upon check-in at camp, all students are encouraged to call home to let parents/guardians know they have arrived safely.

Early Arrival/Late Departure Program

Not available for Adult or Parent/Child Programs

If travel schedule requires arrival at any time the Saturday before camp starts or at any time the Saturday after camp ends, a planned and supervised program,

including all meals and lodging, is available for an additional \$79 per day.

- Arrivals should be scheduled **no earlier than 2 p.m. the day prior** to session start date.
- Departures should be scheduled **no later than noon the day after** graduation.

MERCHANDISE

Optional flight suits and clothing are available for the camp programs. If you choose to order any clothing, your child will receive it while he is at camp. Refer to page 23 for details.

Spending Money

Whether or not you send your child with spending money is a personal decision. All meals are included in the tuition. Spending money comes in handy for snacks or drinks from commercial vending machines located throughout each facility, as well as for purchasing items in our gift shops.

Should you decide to send spending money, we strongly recommend all trainees attending the youth programs exchange their cash for "Space Traveler's Checks" (*Shuttle Bucks in Alabama, Space Bucks in Florida and California, Bomber Bucks at AVIATION CHALLENGE in California*).

U.S. SPACE CAMP and AVIATION CHALLENGE assume no liability for lost cash.

Space Traveler's Checks may be purchased with cash or check **ONLY** (payable to U.S. SPACE CAMP) and **ONLY** at registration. Trainees will be able to convert unused Space Traveler's Checks back to cash at the end of their camp session.

BOY SCOUT MERIT BADGES

Scouts attending SPACE CAMP, SPACE ACADEMY or ADVANCED SPACE ACADEMY qualify for the Space Exploration merit badge and should bring a blue merit badge card to camp to turn in at check-in.

Scouts attending AVIATION CHALLENGE will complete all requirements for the Aviation and Wilderness Survival merit badges and should bring a blue merit badge card to camp to turn in at check-in.

AVIATION CHALLENGE Alabama also offers partial completion of the First-Aid and Fire Safety merit badges. Scouts attending AVIATION CHALLENGE in Alabama will receive a form letter indicating which requirements have been completed for each of these merit badges.

Camp Check-In

Check-in takes place on site at the camp you have selected on the first day of your child's session.

We strongly recommend that you send a copy of all completed forms with your child.

For registration times, please refer to pages 14-15 for SPACE CAMP and pages 21-22 for AVIATION CHALLENGE.

Visiting the Trainee

We understand that you will miss your child while he or she is attending our program. However, we discourage visits while camp is in session so that your child

may have a true "away-from-home" experience.

We do encourage parents to attend graduation ceremonies, and, of course, will make special arrangements for visitation in case of family emergencies.

At registration, parents must designate who is authorized to visit or pick up the trainee; and proper identification is required at the time of visit or pickup.

Telephone Calls

Trainees cannot receive personal phone calls during their session unless it is an emergency. Your child will have the opportunity to call home in the evenings via collect call or calling card (schedule permitting). You may not hear from your child every day. Make sure he/she has phone numbers where family members can be reached at all times. Also make sure that he/she knows how to call collect or use a calling card.

Alabama and Florida facilities are TDD/TTY accessible for the hearing impaired.

Graduation

A formal graduation ceremony is held on site at the camp your child attends on the last day of the session. Family members are invited to attend.

For a schedule of graduation times, please see pages 14-15 for SPACE CAMP and pages 21-22 for AVIATION CHALLENGE.
