

Tired of the same old drag? Need a quick fix for the Winter Time Blues?

Don't spend another boring Spring Break at home with the gang, or bother getting a fast-peel sunburn at the beach.

Take off for a Space Break at U.S. SPACE CAMP®.

Be one of the first to try the exciting additions to Space Camp 1993.

By early March, Space Academy® trainees will suspend in mid-air off the side of the Underwater Astronaut Trainer as you conduct EVAs on the "Zero G Wall."

Both Space Camp and Space Academy trainees can suit up in white lab coats and gloves in March to build a satellite in the new Satellite Clean Room. It's super tidy with 10,000 dust particles per square inch instead of 100,000 particles like in normal rooms.

Inside the Clean Room, four-man crews will build satellite payloads to launch on the space shuttle simulators. Space Camp trainees will construct a basic component, and Space Academy Level I crews will choose a communications, scientific or earth-observation model.

Hold on to your seats in the Spacedome Theater as you soar over mountains and hug sharp curves in the action-packed OMNIMAX® movie SPEED. The 33-minute film uses Star Trek-type effects to pedal, fly and blast you through time and space to the edge of the universe and beyond.

Work quietly at the Endeavour simulator's mission control station with its new safety glass enclosure.

People who attend Space Camp in Huntsville in mid-spring will take a voyage through deep space in the motion-based simulator Journey to Jupiter. They'll travel with 29 other passengers aboard a futuristic public shuttle making fly-bys of a space station and space colony.

Space Break '93

ZERO G WALL

Imagine floating weightless while capturing and repairing a satellite.

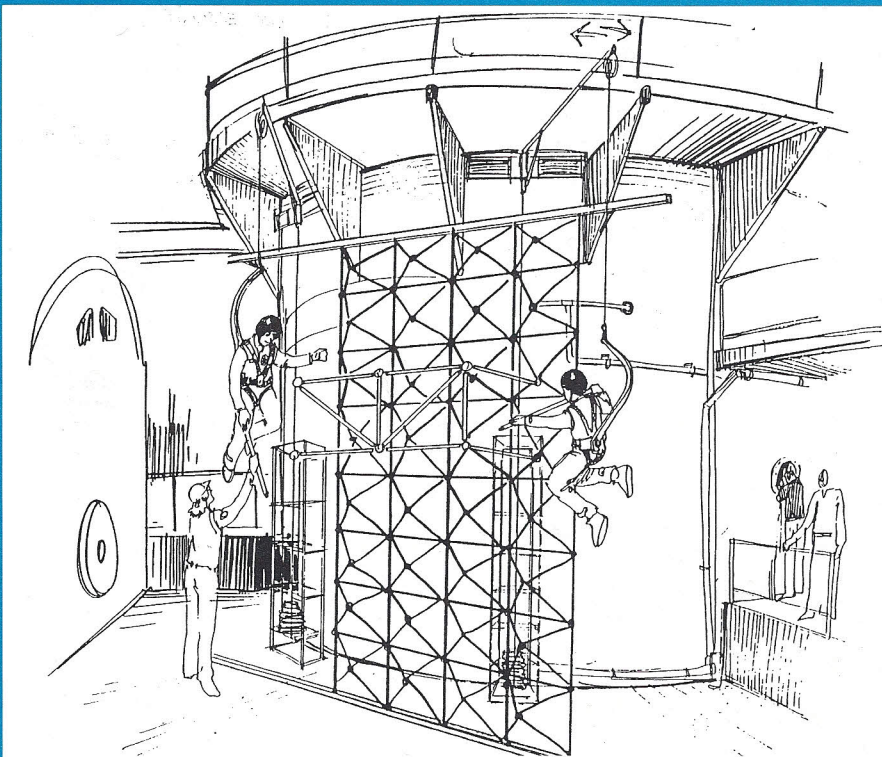

That will be one of the many mission scenarios on the new "Zero G Wall," which is scheduled to be operational by early March.

Space Academy trainees will be suspended off the side of the Underwater Astronaut Trainer to conduct extra-vehicular activities (EVAs) or space walk missions.

A unique water ballast system will make mission specialists neutrally buoyant while working on the "Zero G Wall."

Special seats similar to the 1/6th gravity chairs will be used. Water pumped into "buckets" counterweight the seats to give trainees the sensation of floating weightless.

continued on next page.

Continued from front page
Space Break '93

Trainees headed to Space Camp Florida the week of March 20 can catch the installation ceremony for 13 Gemini astronauts at the U.S. Astronaut Hall of Fame.

There's other bonuses in taking a Space Break '93. Trainees who attend between February and May will save at least \$125 off the summer tuition for Space Camp, Level I and Aviation Challenge. (Summer rates apply for April 4-23.)

Check with your school for your Spring Break schedule, then flip to the back page of the SPACE CAMP NEWS special edition and find out if a Space Camp buddy might be out of school at the same time. You can meet each other at Space Break '93.

Call 1-800-63-SPACE now to make your reservations for Space Break '93.

Zero G Wall continued from front page

Cables running through freely-moving pulleys will allow horizontal maneuvers along the wall.

The objective is to use a series of hand and foot restraints to scale the wall and complete assignments.

EVA's and spacewalk missions on the "Zero G Wall" will include building structures, repairing equipment and conducting rescue missions.

Trainees will capture and repair satellites, deploy solar array and collector panels and repair telescopes.

Aviation '93 Challenge

Former U.S. Navy F-14 pilot Bob Woolley, "Bully" says he's got some new "toys" for you to enjoy down at Aviation Challenge.

He's got a real-life MiG-17 Russian jet stashed behind the basic training building. The subsonic aircraft flies at 600 mph and

Woolley snagged it from the U.S. Air Force. "Go, Navy."

There's a T-38 jet on display, too. NASA uses the aircraft for astronaut training, and Air Force student pilots also use it for advanced training. It flies at Mach 1.2 and is similar to the F-5 Fighter Jet.

The biggest addition to Aviation Challenge, though, is the \$300,000 in simulator upgrades.

Basic and intermediate level trainees will use improved graphics in simulator missions.

Intermediates will experience detailed mountains, buildings and vehicles. Their missions will involve conflicts with Iraqi and Libyan jets, combining simulated air combat with AWAC support.

The B-52 cockpit will be used as an AWAC simulator with vectors and dogfights being monitored on radar simulators.

Basic level trainees won't be exposed to the AWAC missions, but they will learn the basics of air traffic controlling. Advanced and adult trainees will do both.

Another addition to the intermediate level will be a 12-hour mission involving land, water and simulator activities.

Watch for an announcement in the next issue about advanced and adult trainees flying with the Sky Warriors in Atlanta.

HOW TO SAVE MONEY

There are more ways than ever before to save money on your tuition in 1993. Here's a brief rundown.

- Save \$125 by registering for a Spring (tuitions from April 4-23 are the same as June-August session) or Fall session of SPACE CAMP, SPACE ACADEMY, Level I or AVIATION CHALLENGE.
- Save \$50 through the buddy discount by attending with a friend before May 31, 1993. (only in Space Camp grades 4, 5, and 6.)
- When more than one child from the same family with the same address attends any program during the same week, the first child will be at full tuition and each additional child will receive a 10 percent discount.
- If you have attended three sessions of SPACE CAMP, ACADEMY or AVIATION CHALLENGE, you will receive a 10 percent discount when attending your fourth through seventh sessions. Registration for your eighth (or more) session qualifies you for a 25 percent discount.
- If you attend two programs in consecutive weeks, a 10 percent discount is offered on the second week.
- School groups, 4-H clubs, scout troops and others of 15 or more can qualify for group discount rates. Ask for SPACE CAMP Group Reservations when you call the toll-free number.

For full details on all these ways to save money, call 1-800-63 SPACE. Be sure and ask for your free 1993 Official Alabama/Florida Application Guide.
